

# Relative Rates for Tularemia

Missouri - 2004 (Total Cases)

Missouri Total Cases = 28  
Missouri Rate per 100,000 = 0.50

## Rates Relative to Statewide Rate\*\*

No Cases Reported	1.01 - 2.00
0.45 - 0.50	2.01 - 5.00
0.51 - 0.75	5.01 - 10.00
0.76 - 1.00	10.01 - 20.94

\* These counties had 5 or less cases and the relative rates calculation may be unstable.

\*\* Relative rates (RR) are the ratio of the jurisdiction rate to the state rate. For example, a RR of 0.5 means that the jurisdiction has half the observed rate than the state as a whole does. A RR value of 1.0 would be the same as the state and a value of 2.0 would be twice the rate than that observed for the entire state.
